# “How to save your own LIFE”

*You've just received devastating  
News Now What?...*

Thousands of times each day people all over the Globe receive the news that we all dread “I am sorry but you have cancer...” or HIV, Lupus, Diabetes, Alzheimer's etc., the news feels like a gut punch and sends you and your whole family reeling. Go home and cry until there are no more tears and then get

**PROACTIVE.** THIS IS THE WORD THAT MAY SAVE OR PROLONG YOUR LIFE, AND THE **QUALITY** OF THAT LIFE.

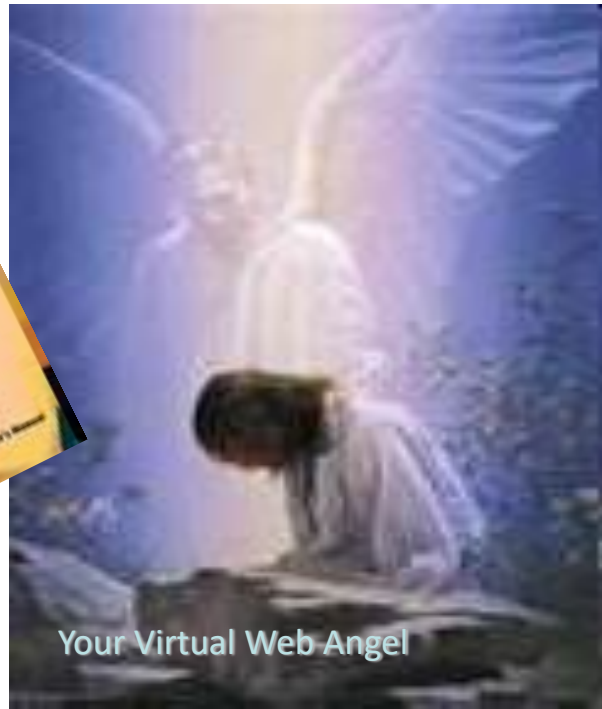

Doctors are not infallible, they are human and humans make mistakes all the time.

## What do you mean by being PROACTIVE?

I mean do something. The first thing you must do is get a second opinion. This is standard modus operandi or Health 101. We are your greatest ALLY and have raised the standard of being PROACTIVE TO AN ART FORM, so you and your family can have peace of mind knowing that everything that can be done is being done on your behalf and that of your loved ones.

## ***"I Google Medical Information all the time...tell me something new!"***

You probably do not know the difference between Directories, Indexes and Search Engines on the internet.

Google and Yahoo are only two, of thousands of Search Engines each holding a distinct cache' of different medical information.

Within *those* thousand, lies another global network of information within specific directories *and within those, lies another and another*, until you would become too exhausted or too frustrated long before you bumbled into some accidental answers for your specific diagnosis.

Knowing HOW to travel the Internet, can make all the difference in your Journey and the quality of your results.

WE HAVE SPENT THOUSANDS OF HOURS DOING ALL THE SEARCHING FOR YOU AND WE CAN TAKE YOU WHERE YOU NEED TO BE WITH OUR **MEDICAL 'GPS'** LOCATOR, AND A FEW KEY STROKES.

IT IS JUST THAT SIMPLE. WE HAVE DONE THE HARD PART FOR YOU. ALL YOU HAVE TO DO IS **BUY YOUR TICKET** TO RIDE, AND A THOUSAND HEALTH EXPERTS ARE WORKING ON YOUR CASE AND THEIR GOAL IS TO SAVE YOUR LIFE.

**THE DIFFERENCE IS THAT YOUR MEDICAL MAGIC CARPET TRAVELS ON THOUSANDS OF SEARCH ENGINES AND DIRECTORY DATA TO FERRET OUT THE MOST OBSCURE, INNOVATIVE CLINICAL TRIALS AND RESEARCH IN REAL TIME MEDICAL MIRACLES, AND ONE OF THEM JUST MIGHT BE YOUR MIRACLE.**

I am reminded of a story about two men who were walking on the beach and came upon thousands of starfish stranded on the sand by low tide and dying in the hot sun. One of the men began to pick them up one by one and toss them back into the sea. His friend remarked that he might as well give up as he could never save all of them and so his efforts did *not matter* in the big scheme of things. He continued to toss the ones he could save into the ocean and replied to his friend, “I know for sure, it mattered to that one...”

This story illustrates our philosophy, if we can save, prolong or increase the quality of one life, then we have a noble purpose.

“He just looked down and said ‘You have lung cancer’, like he was reading a menu...”

“I was suddenly dizzy and did not know how to reply. It was that ‘surreal’ moment you read about in other peoples lives...”

**You are no longer alone. We can put a thousand medical minds to work on your case, to find answers. There is Hope.**

# Saving the Life of Your Child

Welcome to a Parents worst nightmare. If your child is gravely ill there are wonderful charitable Hospitals that will step in to help. St. Judes, Ronald McDonald House, Shriners to name a few, but what happens to the millions of teens diagnosed with ADHD, Depression, Eczema, Cystitis or other socially debilitating illnesses and conditions. Some Pathologies are not physical!

Each year over 33,000 people take their own lives and teens are especially susceptible to the pressures of Life.

# Knowing the signs is crucial

Being **Proactive** can be the difference between Life and Death

- Suicide is the fifth leading cause of death among those 5-14 years old.
- Suicide is the third leading cause of death among those 15-24 years old.
- Between the mid-1950s and the late 1970s, the suicide rate among U.S. males aged 15-24 more than tripled (from 6.3 per 100,000 in 1955 to 21.3 in 1977). Among females aged 15-24, the rate more than doubled during this period (from 2.0 to 5.2). The youth suicide rate generally leveled off during the 1980s and early 1990s, and since the mid-1990s has been steadily decreasing.
- Among young people aged 10-14 years, the rate has doubled in the last two decades.
- Between 1980-1996, the suicide rate for African-American males aged 15-19 has also doubled.
- Risk factors for suicide among the young include suicidal thoughts, psychiatric disorders (such as depression, impulsive aggressive behavior, bipolar disorder, certain anxiety disorders), drug and/or alcohol abuse and previous suicide attempts, with the risk increased if there is situational stress and access to firearms.

# How to save your own LIFE

## Overview of Product development strategy encompassing the initial system

James Thompson is a researcher in Medicine and Legal pursuits. He developed a unique system that has advanced web traffic protocol in a single quantum leap. He has made the impossible possible by allowing the common man into the inner sanctum of the most sacrosanct of professional knowledge. PROFESSIONAL SECRETS ARE NO LONGER SECRET. Most of us use the internet and its capabilities in the same way that we use our brains @ 10% at best. James has changed all that and has a system evolution to give the common man access into the world of the Nobel laureate, and no profession is off limits.

It is a kind of virtual hacking into the brains of some of the smartest people on the planet and asking them to give you a personal hand with your issues. If you knocked on their office you would surely be rebuffed but knock on the virtual door and you are 'just one of the boys', given a Cuban cigar and a key to the city.

Knowing the difference between Indexes, Directories and Search Engines is only the first step. James has incorporated them into your web search dynamo, in much the same way as a canister of Nitrous Oxide hitched to your 327 Chevy engine will take your car from 90 m.p.h. to lift off in a matter of seconds.

Your Internet experience will receive the same boost but with targeted effectiveness.

**Saving time...Saving Lives is only  
the Beginning...**

## What can we do with this new world order in internet protocol?

- We can sell it in bits and pieces to anyone who owns or is interested in computers.
- It can be published in book form for any Discipline or Profession.
- It can be taught in classes both on line and in classrooms such as Phoenix University or PCC.
- We need a curriculum and certification standard to grow a brand on the same model as the Better Business Bureau, so that our logo is not only recognized but preferred as the defining standard for each profession. A stamp of approval to define the Best of the Best. **TV commercials are required** for this step.

*Certified in Medical Data Research*

- It can be taught at any grade level from kindergarten to College level.

- Crib notes and booklets for Scholastic Press at all grade levels

- It eventually can begin a new career, for instance an occupation as a Certified Medical Data Researcher for each and every Medical Office.

- Possible credit curriculum for med-students.

- Video Games for kids, Video Professor** and Amazon can carry the classes on DVD or CD for audio books, and our websites can download the publications as e-books or published books.

- Lots of chances for various subscription services with monthly fees.

- Please note that these possibilities exist for each profession, we have only reviewed the Medical one.
